

DISCLOSURE UNDER PILLAR III OF BASEL III ACCORD

1. SCOPE OF APPLICATION

The Karnataka Bank Limited, a premier private sector Bank, was incorporated on February 18th 1924 in Mangaluru. The Bank does not have any subsidiary/associate companies under its Management.

The Bank presently is not involved in insurance business. However, Bank has entered into a Joint venture agreement and holds equity investments to the extent of 15 per cent in M/s Universal Sompo General Insurance Company Limited. The financials of the joint venture company are not consolidated with the balance sheet of the Bank. The investment in the joint venture is not deducted from the capital funds of the Bank but is assigned risk weights as an investment.

2. CAPITAL STRUCTURE

(Rs in crore)

Sl. No	Particulars	No of equity Shares	Face value per share	Amount
1.	Authorized Capital	500000000	10	500.00
2.	Issued Capital	282727150	10	282.73
3.	Subscribed Capital	282622497	10	282.62
4.	Called up/Paid up Capital	282605947	10	*282.62

*inclusive of Rs.98000 on account of forfeiture of shares.

The Bank's shares are listed on the National Stock exchange of India Ltd and BSE Ltd.

Pursuant to the Rights issue in the ratio of 1:2, the Bank has allotted 94136866 equity shares of Rs.10/- each during the year, at a premium of Rs.60/- per share aggregating to Rs.658.96 crore. In accordance with the provisions of Section 52(2)(c) of the Companies Act 2013 and as provided under the Letter of Offer dated 28.10.2016, the expenses incurred in this connection, aggregating to Rs.4.41 crore have been charged off to the Share Premium account.

During the year ended March 31, 2017 the Bank has allotted 13060 equity shares to employees under its Employee Stock Option Plan.

a. Breakup of Capital Funds

The Tier I Capital of the Bank comprises of

(Rs in crore)

1.	Paid up Capital (Including forfeited shares)	282.62
2.	Reserves	4466.80
	Total	4749.42

The Tier II Capital of the Bank comprises of

(Rs in crore)

1	Undisclosed reserves	17.45
2	General Provisions and Loss Reserves	240.29
3	Subordinated debts eligible for inclusion in Lower Tier 2 Capital	165.00
	Total	422.74

The Total capital comprises of:

(Rs in crore)

1	Tier I Capital	4749.42
2	Tier II Capital	422.74
	Total	5172.16

Details of the aggregate amounts of the bank's total interests in insurance entities, which are risk-weighted:

(Rs in crore)

Name of the insurance entities / country of incorporation	Principle activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity / proportion of voting power	Quantitative impact on regulatory capital of using risk weighting method versus using the full deduction method
Universal Sompo General insurance Co Ltd / India	General Insurance	350	15%	CRAR is reduced by 0.07%

b. Assessment of Capital Adequacy

An assessment of the capital requirement of the Bank is carried out through comprehensive projections of future business that takes cognizance of the strategic intent of the Bank, profitability of particular business and opportunities for growth. The proper mapping of credit, operational and market risks to this projected business growth enables assignment of capital that not only adequately covers the minimum regulatory capital requirements but also provides headroom for growth. The calibration of risk to business is enabled by a strong risk culture in the Bank aided by effective, technology based risk management systems.

A summary of the Bank's Capital requirement under Basel III for credit, market and operational risk and the capital adequacy ratio is detailed below.

(Rs in crore)

A	Capital requirement for Credit Risk	
	- Portfolios subject to Standardized approach	2971.55
	- Securitization exposures	-
B	Capital requirement for Market Risk	
	Standardized duration approach	245.14
	- Interest rate Risk	155.16
	- Foreign exchange risk	1.52
	- Equity Risk	88.46

(Rs in crore)

C	Capital requirement for Operational Risk	
	- Basic Indicator approach	284.52
D	Total Capital requirement (**)	3501.21
E	Total eligible Capital Funds of the Bank as per Basel III	5172.16
F	Total Risk Weighted Assets	38902.25
G	Common Equity Tier I ratio (CET1) (%)	12.21%
H	Tier I CRAR (%)	12.21%
I	Tier II CRAR (%)	1.09%
J	Total CRAR (%)	13.30%

** Excluding CCB

3. RISK MANAGEMENT: OBJECTIVES AND ORGANIZATION STRUCTURE

The various risks taken by the Bank during the course of the business development are identified, assessed, measured, controlled, monitored, mitigated and reported effectively. The key components of the Bank's risk management rely on the risk governance architecture, comprehensive processes and internal control mechanism. The Bank's risk governance architecture focuses attention on key areas of risk such as credit, market and operational risk and quantification of these risks wherever possible for effective and continuous monitoring.

a. Objectives and Policies

The Bank's risk management processes are guided by well-defined policies appropriate for various risk categories, independent risk oversight and periodic monitoring through the sub-committees of the Board of Directors. The Bank has a well documented Board approved 'Risk Management Policy' in place. The Board sets the overall risk appetite and philosophy for the Bank. The Board of Directors, the Integrated Risk Management Committee and the Audit Committee of the Board review various aspects of risk arising from the businesses of the Bank.

b. Structure and Organization

The Bank has a risk management system that is centralized with a three track committee approach. The committees are - Credit Policy Committee (CPC), Asset Liability Management Committee (ALCO) and Operational Risk Management Committee (ORMC). An Integrated Risk Management Committee (IRMC) evaluates the overall risk factors faced by the bank and directly reports to the Board of directors.

CPC deals with credit policies and procedures, ALCO deals with Asset Liability Management (ALM) and Investment Policy of the Bank and ORMC formulates policies and procedures for managing operational risk.

4. CREDIT RISK MANAGEMENT

Bank has developed an online comprehensive credit risk rating system for all borrower accounts. Risk rating of borrowers is intended to help banks in quantifying and aggregating the credit risk across various exposures. The bank has validated its existing rating models and refined/revised the corporate models, besides introduction of Specialized lending rating models, Retail score card models [Pool based approach] and Facility rating. Accordingly, bank is rating its credit portfolio as per the criteria laid down for rating in the Loan Policy of the Bank. The rating serves as a single point indicator of diverse risk factors of counter-party and for taking credit decisions. The risk rating system is drawn up in a structured manner, incorporating different factors such as borrower and industry specific characteristics. The Bank also undertakes periodic validation exercise of its rating models and also conducts migration and default rate analysis to test robustness of its rating models.

The Bank has formulated a comprehensive Loan Policy by incorporating various parameters and prudential limits to manage and control default, transaction and intrinsic/concentration risk. The credit exposures are taken after subjecting the proposals to analysis of various risk factors such as financial risk, industry risk, management risk, business risk, transaction risk etc.

The Bank analyses the migration of borrowers in various risk rating categories to gauge the quality of the loan portfolio. The Bank also conducts periodical review of the loan assets to ascertain conduct of the accounts. The Bank conducts periodical Credit Audit and Stock Audit of large credit exposures to limit the magnitude of credit risk and interest rate risk.

Credit sanction and related processes

Know Your Customer is a leading principle for all business activities. The other components of the credit processes are:

1. Sound credit approval process with well laid credit sanctioning criteria.
2. The acceptability of credit exposure, primarily based on the sustainability and adequacy of borrower's normal business operations and not based solely on the availability of security.
3. Portfolio level risk analysis and reporting to ensure optimal spread of risk across various rating classes to prevent undue risk concentration across any particular industry segments and monitor credit risk migration.
4. Sector specific studies at periodic intervals to highlight risks and opportunities in those sectors.
5. Adoption of rating linked exposure norms.
6. Industry-wise exposure ceilings based on the industry performance, prospects and the competitiveness of the sector.
7. Separate risk limits for credit portfolios like advances to NBFC and unsecured loans that require special monitoring.

Review and Monitoring

1. All credit exposures, once approved, are monitored and reviewed periodically against the approved limits. Borrowers with lower credit rating are subject to more frequent reviews.
2. Credit monitoring involves independent review of credit risk assessment, compliance with internal policies of the Bank and with the regulatory framework, compliance with the sanction terms and conditions and effectiveness of loan administration.
3. Customers with emerging credit problems are identified early and classified accordingly. Remedial action is initiated promptly to minimize the potential loss to the Bank.

Concentration Risk

The Bank controls concentration risk by means of appropriate sectoral limits and borrowers limits based on creditworthiness. The Bank also captures the Concentration risk by monitoring the geographical exposure.

Large exposures to individual clients or group

The Bank has individual borrower-wise exposure ceilings based on the internal rating of the borrower as well as group-wise borrowing limits. The Bank monitors the level of credit risk (Low/Moderate/High/Very High) and direction of change in credit risk (increasing /decreasing/ stable) at the portfolio level.

Definition of Non-Performing Assets

Bank has adopted the definition of the past due and impaired assets (for accounting purposes) as defined by the regulator for income recognition and asset classification norms.

Exposures

Total gross credit exposure including geographic distribution of exposure

(Rs in crore)

	Domestic	Overseas	Total
Fund Based	41870.39	0	41870.39

29.	West Bengal	1282.49	235.74	1518.23
	Total	41870.39	5584.55	47454.94

While determining level and direction of credit risk, parameters like percentage of low- risk credit (investment grade and above) to credit risk exposure and migration from investment to non-investment grade (quantum as percentage of credit risk exposure) are also considered. The Bank monitors the rating-wise distribution of its borrowers also.

Exposure to Industries

Industry analysis plays an important part in assessing the concentration risk within the loan portfolio. Particular attention is given to industry sectors where the Bank believes that there is a high degree of risk or potential for volatility in the future. The Bank has fixed internal limits for aggregate commitments to different sectors so that the exposures are evenly spread over various sectors.

The credit policy deals with short term as well as long term approach to credit risk management. The policy of the Bank embodies in itself the areas of risk identification, risk measurement, risk grading techniques, reporting and risk control systems /mitigation techniques, documentation

practice and the system for management of problematic loans.

Distribution of Credit Exposure by Industry sector

(Rs in crore)

Sl. No.	Industry	Fund based	Non Fund based	Total

Geography	Gross NPA	Specific Provision	General Provision
Domestic	1581.59	581.60	5.35
Overseas	0.00	0.00	0.00
Total	1581.59	581.60	5.35

Disclosure for portfolios subject to the standardized approach

Large corporate borrowers and Public Sector Enterprises are being encouraged to solicit ratings from approved external rating agencies and wherever such ratings are available the Bank uses the same in assigning risk weights. Bank has approved 6 domestic credit rating agencies identified by RBI i.e. CRISIL, CARE, India Ratings and Research Private Limited (earlier FITCH India), ICRA, Brickwork and SMERA Ratings Limited. The ratings available in public domain are mapped according to risk profile and specific risk characteristics of each rating grade of respective agencies as envisaged in RBI guidelines.

The credit exposure [fund based & non fund based] after risk mitigation (subject to the standardized Approach) in different risk buckets are as under:

(Rs in crore)

Sl No	Risk weight	Exposure Outstanding
1.	Below 100%	17176.99
2.	100%	11102.62
3.	More than 100%	6503.30
	Total	34782.91

Credit Risk Mitigation: Disclosures for Standardized Approach

As stipulated by the RBI guidelines, the Bank uses the comprehensive approach for collateral risk mitigation. Under this approach, the Bank reduces its credit exposure to counterparty when calculating its capital requirements to the extent of risk mitigation provided by the eligible financial collateral as specified in the Basel guidelines.

Types of eligible financial collateral / Guarantors:

The Bank recognizes only specified types of financial collateral and guarantees (counter-guarantors) for providing capital relief in line with Basel II guidelines on credit risk mitigation.

This includes cash, Bank own deposits, gold (including bullion and jewellery, subject to collateralized jewellery being notionally converted/benchmarked to 99.99 per cent purity), securities issued by the Central and State Governments, Kisan Vikas Patra, National Savings certificates, life insurance policies with a declared surrender value which is regulated by IRDA, certain debt securities rated by a recognized credit rating agency, certain debt securities not rated but issued by Banks and listed on a recognized exchange and are classified as senior debt, certain mutual fund units where daily Net Assets Value (NAV) is available in public domain.

Eligible Guarantors (counter-guarantors):

Credit protection given by the following entities is recognized:

- i. Sovereigns, sovereign entities (including BIS, IMF, European Central Bank and European Community as well as permitted MDBs, ECGC, CRGFTLIH and CGTMSE), banks and primary dealers with a lower risk weight than the counterparty;
- ii. Other entities that are externally rated except when credit protection is provided to a securitization exposure. This would include credit protection provided by parent, subsidiary and affiliate companies when they have a lower risk weight than the obligor.
- iii. When credit protection is provided to a securitization exposure, other entities that currently are externally rated BBB- or better and that were externally rated A- or better at the time the credit protection was provided. This would include credit protection provided by parent, subsidiary and affiliate companies when they have a lower risk weight than the obligor.

The extent of total credit exposure (under the standardized approach) covered by eligible financial collaterals after application of haircuts are furnished below:

(Rs in crore)	
Eligible financial collaterals after haircuts	4136.13
Eligible guarantees	852.23

5. MARKET RISK & LIQUIDITY RISK

The Bank has put in place Board approved Integrated Treasury Policy and Asset Liability Management (ALM) policy for effective management of market risk in the Bank. The objective of Integrated Treasury Policy is to assess and minimize risks associated with treasury operations by extensive use of various risk management tools. Broadly, it encompasses Policy prescriptions for managing systemic risk, credit risk, market risk, operational risk and liquidity risk in treasury operations.

For market risk arising out of various products in treasury and its business activities, the Bank has set regulatory / internal limits and ensures the adherence thereof. Migration of ratings is tracked regularly. Limits for exposures to counter-parties, industries and countries are monitored and the risks are controlled through Stop Loss Limits, Overnight limit, Daylight limit, Aggregate Gap limit, Individual gap limit, Value at Risk (VaR) limit for Forex, Inter-Bank dealing and various investment limits. For the Market Risk Management the Bank has a Mid Office. The functions of Mid Office are handled by Integrated Risk Management Department.

The Board, IRMC & ALCO are overseeing the market risk management of the Bank, procedures thereof, implementing risk management guidelines issued by regulator, best risk management practices followed globally and ensures that internal parameters, procedures, practices/policies and risk management prudential limits are adhered to.

The policies for hedging and/or mitigating risk and strategies and processes for monitoring the continuing effectiveness of hedges/mitigates are discussed in ALCO and based on views taken by / mandates of ALCO, hedge deals are undertaken.

Liquidity risk of the Bank is assessed through daily gap analysis for maturity mismatch based on residual maturity in different time buckets as well as various liquidity ratios and management of the same is done within the prudential limits fixed thereon. Advance techniques such as Stress testing, simulation, sensitivity analysis etc. are conducted on regular intervals to draw the contingency funding plan under different liquidity scenarios.

Market Risk in Trading Book

Bank has adopted the Standardized Duration Approach as prescribed by RBI for computation of capital charge for market risk and is fully compliant with such RBI guidelines. Bank is now preparing itself for the Advanced Approach based on a Value at Risk (VaR) model, which is under implementation.

The capital requirements for market risk are detailed below:

SI No	Risk Category	Capital Charge
I	Interest Rate	155.16
II	Equity	88.46
III	Foreign Exchange , Gold and Derivatives	1.52
IV	Total Capital Charge for market Risk (I+II+III)	245.14

(Rs in crore)

6. INTEREST RATE RISK IN THE BANKING BOOK (IRRBB)

The interest rate risk is viewed from two perspectives i.e. 'Earnings Perspective' and 'Economic Value Perspective'. Generally, the former is measured using Earnings-at-Risk (EaR) under Traditional Gap Analysis (TGA) and the latter is measured through changes in the Market value of Equity (MVE) under Duration Gap Analysis (DGA).

➤ **Earnings-at-Risk (EaR):**

All the Rate Sensitive Assets (RSA) and Rate Sensitive Liabilities (RSL) maturing/re-pricing up to 1 year are bucketed as per Traditional Gap Analysis (TGA) and EaR analysis is conducted by applying various shocks on product-wise weighted average interest rates in each time band. EaR is quantified by changes in the NII and NIM in comparison with the previous financial year end.

➤ **Impact on Market Value of Equity (MVE):**

Impact on Market Value of Equity (MVE) is analyzed through Duration Gap Analysis (DGA) which involves bucketing of market value of all Rate Sensitive Assets and Rate Sensitive Liabilities as per residual maturity/ re-pricing in various time bands and computing Modified Duration Gap. Accurate method is adopted for computing the

market value by discounting each cash flow of all Rate Sensitive Assets (RSA) and Rate Sensitive Liabilities (RSL) with various discount curves as suggested by RBI. Notional interest rate shocks are applied on the resultant Modified Duration Gap to arrive at the changes in the Market Value of Equity (MVE).

- Prudential limits have been fixed for changes in NIM and MVE for 200bps shock in the interest rates and monitored on a monthly basis.
- Earning at Risk for 200 bps interest rate shock is estimated at Rs.63.95 crore and change in the Market value of Equity for 200 bps interest rate shocks is +22.88%.

7. OPERATIONAL RISK

Strategies and Processes: Bank has initiated several measures to manage operational risk through identification, assessment and monitoring of inherent risks in all its business processes. A framework has been laid to capture loss data which can be mapped to operational risk events to measure the impact quantitatively. Bank has put in place a hierarchical structure to effectively manage operational risk through the formation of internal committee viz., Operational Risk Management Committee (ORMC).

Scope and Nature of Operational Risk Reporting and Measurement Systems

A systematic process for reporting risk events, loss events, “near misses” and non-compliance issues relating to operational risks have been developed and implemented. The information gathered will be used to develop triggers to initiate corrective actions to improve controls. All critical risks and potential loss events are reported to the senior Management/ORMC/IRMC as appropriate for their directions and suggestions.

An Operational Risk Management Policy approved by the Risk Management Committee of the Board details the framework for hedging and/or mitigating operational risk in the Bank. As per the policy, all new products are vetted by the New Product Approval Committee to identify and assess potential operational risks involved and suggest control measures to mitigate the risks.

Approach for Operational Risk Capital Assessment

As per the RBI guidelines, the Bank has adopted Basic Indicator Approach for computing capital charge for Operational Risk. Steps have been initiated to migrate to the Advanced Measurement Approach.

8. EXPOSURE RELATED TO COUNTERPARTY CREDIT RISK

Counterparty Credit Risk exposures for banks are assessed based on Bank’s business requirements and considering counterparty bank’s parameters such as CRAR, net worth, NPA level etc. Counterparty exposures for other entities are assessed subject to exposure ceilings as

per the Loan Policy of the Bank. Capital for Counterparty Credit Risk exposure is assessed based on Standardized Approach.

The Bank does not recognize bilateral netting. The credit equivalent amount of derivative exposure is calculated using Current Exposure Method and the balance outstanding as on 31st March 2017 is as under:

(Rs. in crore)

Particulars	Notional Amount	Current Exposure
Foreign exchange contracts	2222.43	78.17
Interest rate contracts	Nil	Nil
Total	2222.43	78.17

9. COMPOSITION OF CAPITAL:

(Rs. in million)

		Amount	Amounts Subject to Pre-Basel III Treatment
Common Equity Tier 1 capital: instruments and reserves			
1.	Directly issued qualifying common share capital plus related stock surplus (share premium)	15665.69	
2.	Retained earnings

Disclosures pertaining to main features of equity and debt capital instruments and the terms and conditions of equity and debt capital instruments have been disclosed separately on the Bank's website under 'Regulatory Disclosures Section'. The link to this section is <http://ktkbank.com/ktk/BaselDisclosures.jsp>

10. Disclosures on Remuneration

(a)	Information relating to the composition and mandate of the Nomination & Remuneration Committee (N&RC).
	The Nomination & Remuneration Committee (N&RC) consists of only Independent Directors, two of them being the members of Integrated Risk Management Committee of the Board (IRMC) also.
(b)	Information relating to the design and structure of remuneration processes and the key features and objectives of remuneration policy.
	Compensation Policy aims to attract and retain the right candidates in the Bank. The policy is designed to support key business strategies and create a strong, performance-orientated environment besides providing reasonable remuneration commensurate with the growth of the Bank. It also ensures effective governance of compensation, alignment of compensation with prudent risk taking, effective supervisory oversight and stakeholder engagement. The Policy also aims at facilitating effective succession planning in the Bank.

	The N&RC works in close coordination with the Integrated Risk Management Committee to ensure effective alignment of remuneration and risks.
(c)	Description of the ways in which current and future risks are taken into account in the remuneration processes. It should include the nature and type of the key measures used to take account of these risks.
	A wide variety of measures of credit, market and liquidity risks are used by bank in implementation of risk adjustment. The risk adjustment methods have both quantitative and judgmental elements. Compensation outcomes are symmetric with risk outcomes and compensation payouts are sensitive to the time horizon of the risk.
(d)	Description of the ways in which the bank seeks to link performance during a performance measurement period with levels of remuneration.
	The performance-based remuneration motivates and rewards high performers who strengthen long-term customer relations, and generate income and shareholder value. The bank's compensation policy stipulates that while designing the compensation package to WTD/CEO, it is ensured that there is a proper balance between fixed pay and variable pay. While fixing the Variable Pay performance parameters under financial and non-financial areas of operations shall be assessed.
(e)	A discussion of the bank's policy on deferral and vesting of variable remuneration and a discussion of the bank's policy and criteria for adjusting deferred remuneration before vesting and after vesting.
	The variable pay shall not exceed 70% of the fixed pay in a year. The deterioration in the financial performance of the bank should generally lead to a contraction in the total amount of variable remuneration to be paid. Further, where the variable pay constitutes a substantial portion of the fixed pay (i.e. 50% or more of the fixed pay), an appropriate portion of the variable pay, say 40% to 60% must be deferred for over a period. The Board/Nomination & Remuneration Committee may grant stock options under the Employees Stock Options Plan/Scheme as per Securities and Exchange Board of India (Share Based Employee Benefits) Regulations, 2015, subject to the approval of Reserve Bank of India under Section 35B of the Banking Regulation Act, 1949. Such Stock Options will be excluded from the components of variable pay. In case variable pay payable is 50% or more, deferral arrangements of variable pay shall be applied. The deferral period should not be less than three years. Compensation payable under deferral arrangements should vest on a pro-rata basis at such rates as may be decided by the Board/RC. In the event of negative contributions of the Bank and/or the relevant line of business in any year, the deferred compensation is subject to malus/claw back arrangements.
(f)	Description of the different forms of variable remuneration (i.e. cash, shares, ESOPs and other forms) that the bank utilizes and the rationale for using these different forms.
	The variable pay could be in cash, or stock linked instruments or mix of both.

Quantitative Disclosures:

		Current Year (2016-17)	Previous Year (2015-16)
(g)	Number of meetings held by the Remuneration Committee during the financial year and remuneration paid to its members.	Five Sitting fees of Rs.20000/- (₹50000/- w.e.f. 01.01.2017) to each non-whole time Director members per meeting attended.	Two Sitting fees of Rs.20000/- to each non-whole time Director members per meeting attended.
(h)	(i) Number of employees having received a variable remuneration award during the financial year.	One	One
	(ii) Number and total amount of sign-on awards made during the financial year.	Nil	Nil
	(iii) Details of guaranteed bonus, if any, paid as joining / sign on bonus	Nil	Nil
	(iv) Details of severance pay, in addition to accrued benefits, if any.	Nil	Nil
(i)	(i) Total amount of outstanding deferred remuneration, split into cash, shares and share-linked instruments and other forms.	Nil	Nil
	(ii) Total amount of deferred remuneration paid out in the financial year.	Nil	Nil
(j)	Breakdown of amount of remuneration awards for the financial year to show fixed and variable, deferred and non-deferred.	Fixed: Rs.64.80 lakh Variable: Rs. 8.34 lakh for the year 2015-16 was paid during the year under report.	Fixed:Rs.60.18 lakh Variable: Rs. 7.42 lakh for the year 2014-15 was paid during the year under report.
(k)	(i) Total amount of outstanding deferred remuneration and retained remuneration exposed to ex post explicit and / or implicit adjustments.	Nil	Nil
	(ii) Total amount of reductions during the financial year due to ex- post explicit adjustments.	Nil	Nil
	(iii) Total amount of reductions during the financial year due to ex- post implicit adjustments.	Nil	Nil

11. EQUITIES - DISCLOSURE FOR BANKING BOOK POSITIONS

The risk oversight relating to the equity portfolio is part of the overall independent risk management structure of the Bank and is subjected to the risk management processes and policies along with Integrated Treasury Policy approved by the Board of Directors of the Bank.

In accordance with the RBI guidelines, entire investment portfolio of the Bank including equity investments is classified on the date of purchase as:

- ❖ HFT - Held for Trading
- ❖ AFS - Available for Sale and
- ❖ HTM - Held to Maturity.

Investments which the Bank intends to hold till maturity are classified as HTM securities. In accordance with the RBI guidelines, equity investments held under the HTM category are classified as banking book for capital adequacy purpose. Equity investments only in the equity of subsidiaries/joint ventures are eligible to be categorized as HTM in accordance with the RBI guidelines.

Further, investments in Private Equity funds are eligible to be accounted under HTM portfolio for the initial period of 3 years; bank will shift all such portions of draw down for the respective financial year to AFS category. All other investments are required to be classified as HFT / AFS securities.

Further, Investments classified under HTM category are carried at their acquisition cost and not marked to market. Any diminution, other than temporary, in the value of equity investments is provided for.

Profit on sale of investment in the HTM category will be first taken to the Profit and loss account, and thereafter be appropriated to the 'Capital Reserve Account'. The amount so appropriated would be net of taxes and the amount required to be transferred to statutory reserves. Loss on sale of HTM will be recognized in the profit and loss account.

The Bank has classified investments in PE for Rs 361.61 Lakhs as at March 31, 2017 under HTM as per prudential guidance. There has been no sale or liquidation or shifting to other categories from above mentioned investments during the year ended March 31, 2017 from the HTM category. On account of this investment, the Bank has not recognized any unrealized gain or loss in the financial statement as of March 31, 2017.

12. LEVERAGE RATIO

Qualitative Disclosure:

Under Basel III, a simple, transparent, non-risk based ratio called leverage ratio has been introduced which is calibrated to act as a credible supplementary measure to the risk based capital requirements. This ratio acts as a "backstop" measure to the risk based capital

requirements and constrains the build-up of leverage in the banking sector.

The Leverage Ratio is computed as:

$$\text{Leverage Ratio} = \frac{\text{Capital Measure (Tier I capital)}}{\text{Exposure Measure}}$$

The capital measure is the Tier 1 capital of the risk-based capital framework, taking into account various regulatory adjustments/deductions and the transitional arrangements. The exposure measure is the sum of on-balance sheet exposures, derivative exposures, securities financing transaction (SFT) exposures and off-balance sheet items.

Summary comparison of accounting assets vs. leverage ratio exposure measure

(Rs. in millions)

	Item	Amount
1.	Total consolidated assets as per published financial statements	641265.47
2.	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	0
3.	Adjustment for fiduciary assets recognized on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	0
4.	Adjustments for derivative financial instruments	781.70
5.	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	3500.00
6.	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off- balance sheet exposures)	50174.38
7.	Other adjustments (Amount deducted from Capital)	0
8.	Leverage ratio exposure	695721.55

Leverage ratio		
22.	Basel III leverage ratio	6.83%

13. LIQUIDITY COVERAGE RATIO

Qualitative Disclosure:

Bank is computing LCR on a daily basis in line with the RBI circular dated June 9, 2014 on “Basel III Framework on Liquidity Standards – Liquidity Coverage Ratio (LCR), Liquidity Risk Monitoring Tools and LCR Disclosure Standards”. These guidelines ensure that banks maintain sufficient amount of High Quality Liquidity Assets (HQLAs) to survive 30 days stress scenario so that banks can take corrective measures within such period. These HQLAs have to be 100% of the net cash outflows w.e.f. January 1, 2019. To provide sufficient transition period, the guidelines require maintaining minimum 60% w.e.f. January 1, 2015 and step up of 10% every year to reach 100% by January 1, 2019.

Bank’s Asset Liability Management Committee (ALCO) is empowered to monitor and form suitable strategies to maintain stipulated levels of LCR by channelizing funds to target good quality asset and liability profile to meet Bank’s profitability as well as liquidity requirements. Funding strategies are formulated by the Treasury and Accounts Department (TAD) in accordance with ALCO guidance. The objective of the funding strategy is to achieve an optimal funding mix which is consistent with prudent liquidity, diversity of sources and servicing costs. Accordingly, TAD estimates daily liquidity requirement. With the help of structural liquidity statement prepared by bank, TAD evaluates current and future liquidity requirement and takes necessary action.
