

Dear Customer, do not search our Bank's toll free number or any other information in Google or in any search engines or in True Caller or any other Caller ID apps. Fraudsters are posting their mobile numbers as Bank's toll free numbers and luring to share sensitive information like Debit Card credentials, username, OTP, etc. to access your accounts and carryout fraudulent transactions.

For example, if the toll free number of the Bank is 1800 123 1234 (not an actual number). The fraudster obtains a number, say 800 123 1234, resembling the Bank's toll free number and registers successfully on the True caller app (or any caller identification application) as the toll free number of the Bank. Be aware and always access Bank's corporate website <https://karnatakabank.com> for toll free number or any other information. Never share your credentials such as User ID, Password, PIN, OTP, etc. to anyone. Bank never asks for the same
