MANAGEMENT DISCUSSION AND ANALYSIS

Macro-economic and industry Developments :

Macroeconomic fundamentals have improved with the inflation declining by over 6 per cent since late 2013, current account deficit has comedown from a peak of 6.7 per cent of GDP to an estimated 1.0 per cent in the coming financial year. Since 2013-14 economy is growing at 7.2 per cent on an average, based on the new growth estimates.

Domestic economic activity is exhibiting the signs of recovery and has strengthened during quarter ended March 2015. Second advance estimates of the Ministry of Agriculture suggest that the contraction in food grains production in 2014-15 may turn out to be less than earlier anticipated. The industrial sector particularly the manufacturing sector appears to be regaining momentum with the growth of production. For the full fiscal year 2014-15, the government estimated that the economy would have expanded by about 7.4% representing a significant acceleration over revised 6.9 per cent increase for the previous year. Sustained foreign portfolio flows aggregating US\$ 38.4 billion since April 2014 have stabilised the rupee exerting downward pressure on long term interest rates, reflecting in the yield on 10 year G-Sec and contributing surge in the equity prices.

The annual rate of inflation, based on monthly WPI, stood at -2.33% for the month of March 2015 (over March 2014) as compared to -2.06% for the previous month and 5.70% during the corresponding month of the previous year. Annual average CPI inflation has also come down to 5-6% compared to double digits or just below for the last six years. The headline CPI inflation receded over the last twelve months from 8.59 per cent in April 2014 to 5.17 per cent in March 2015. As both CPI and WPI data continues to comprehensively address concerns over inflation, it is expected that the rates may come down during the next financial year.

With the implementation of Risk-Based Internal Audit (RBIA), greater emphasis is placed on the internal auditor's role in mitigating various risks. While continuing with the traditional risk management and control methods involving transaction testing etc., the risk-based internal audit would, not only offer suggestions for mitigating current risks but also on potential future risks, thereby playing an important role in the risk management process of the Bank.

The RBIA assessment is undertaken, inter-alia, for the purpose of drawing the annual audit plan. The risk assessment would, as an independent activity, cover risks at various levels (corporate and branch; portfolio and individual transactions etc.) as also the processes in place to identify, measure, monitor and control the risks. The internal audit department is devising the RBIA risk assessment methodology, with the approval of the

recommendations made by the said Committee have been complied with and the remaining few which require up-gradation of the Bank's Core Banking Solution are being pursued for early compliance.

FINANCIAL INCLUSION

Financial Inclusion means making available the full range of banking services at an affordable cost to the people who do not have access to banking services. It mainly focuses on the section of society not having formal financial institutional support. Through the Financial Inclusion Plan, Bank aims at 'connecting people' with the Bank and not just opening accounts. This includes meeting the small credit needs of the rural public, giving them access to the payments system, providing remittance facility and life and health insurance. Efforts are being made to optimize the resources to achieve the goal of extending banking facilities to the un-banked areas/deprived sections.

All the branches of the Bank are under Core Banking Solution (CBS) and all the branches to be opened in future will also be under CBS. Out of 675 branches, Bank has 140 rural branches and all these branches are provided with CBS offering all banking facilities to the rural clientele in the gram panchayats or villages where these branches are located. All the rural branches are acting as financial literacy centers (FLCs) and imparting Banking literacy among the rural Populace.

In accordance with announcement of Prime Minister Jan Dhan Yojana (PMJDY) on August 15, 2014 revised Strategy & Guidelines of Department of Financial Services (DFS), Ministry of Finance, Govt. of India, has been considered for implementation of Financial Inclusion activity of the Bank. PMJDY takes in to account both rural sub service areas (SSAs) and urban wards for Financial Inclusion. The Bank had followed the intrinsic value method for valuing the stock options. Intrinsic value is the amount by which the quoted market price of the underlying share exceeds the exercise price of the option. As all the cost on the basis of intrinsic value of options granted has already been accounted in the earlier year itself, there is no charge to the profit and loss account during this year and therefore there is no impact on the Earnings per share on account of Bank following intrinsic value method of accounting vis-a-vis the fair value method of accounting.

3. RISK MANAGEMENT: OBJECTIVES AND ORGANIZATION STRUCTURE

The various risks taken by the Bank during the course of the business development are identified, assessed, measured, controlled, monitored, mitigated and reported effectively. The key components of the Bank's risk management rely on the risk governance architecture, comprehensive processes and internal control mechanism. The Bank's risk governance architecture focuses attention on key areas of risk such as credit, market and operational risk and quantification of these risks wherever possible for effective and continuous monitoring.

a. Objectives and Policies

The Bank's risk management processes are guided by well-defined policies appropriate for various risk categories, independent risk oversight and periodic monitoring through the sub-committees of the Board of Directors. The Bank has a well documented Board approved 'Risk Management Policy' in place. The Board sets the overall risk appetite and philosophy for the Bank. The Board of Directors, the Integrated Risk Management Committee and the Audit Committee of the Board review various aspects of risk arising from the businesses of the Bank.

b. Structure and Organization

The Bank has a risk management system that is centralized with a three track committee approach. The committees are- Credit Policy Committee (CPC), Asset Liability Management Committee (ALCO) and Operational Risk Management Committee (ORMC). An Integrated Risk Management Committee (IRMC) evaluates the overall risk factors faced by the Bank and directly reports to the Board of directors.

CPC deals with credit policies and procedures, ALCO deals with Asset Liability Management (ALM) and Investment Policy of the Bank and ORMC formulates policies and procedures for managing operational risk.

4. CREDIT RISK MANAGEMENT

Bank has developed online comprehensive credit risk rating system for all borrower accounts. Risk rating of borrowers intended to help banks in quantifying and aggregating the credit risk across various exposures. The Bank has validated its existing rating models and refined/revised the corporate models, besides introduction of Specialized lending rating models, Retail score card models [Pool based approach] and Facility rating. Accordingly, Bank is rating its credit portfolio as per the criteria laid down for rating in the Loan Policy of the Bank. The rating serves as a single point indicator of diverse risk factors of counter-party and for taking credit decisions. The risk rating system is drawn up in a structured manner, incorporating different factors such as borrower and industry specific characteristics. The Bank also undertakes periodic validation exercise of its rating models and also conducts migration and default rate analysis to test robustness of its rating models.

The Bank has formulated a comprehensive Loan Policy by incorporating various parameters and prudential limits to manage and control default, transaction and intrinsic/concentration risk. The credit exposures are taken after subjecting the proposals to analysis of various risk factors such as financial risk, industry risk, management risk, business risk, transaction risk etc.

The Bank analyses the migration of borrowers in various risk rating categories to gauge the quality of the loan portfolio. The Bank also conducts periodical review of the loan assets to ascertain conduct of the accounts. The Bank conducts periodical Credit Audit and Stock Audit of large credit exposures to limit the magnitude of credit risk and interest rate risk.

Credit sanction and related processes

Know Your Customer is a leading principle for all business activities. The other components of the credit processes are:

1. Sound credit approval process with well laid credit sanctioning criteria.
2. The acceptability of credit exposure, primarily based on the sustainability and adequacy of borrower's normal business operations and not based solely on the availability of security.
3. Portfolio level risk analysis and reporting to ensure optimal spread of risk across various rating classes to prevent undue risk concentration across any particular industry segments and monitor credit risk migration.
4. Sector specific studies at periodic intervals to highlight risks and opportunities in those sectors.
5. Adoption of rating linked exposure norms.
6. Industry-wise exposure ceilings based on the industry performance, prospects and the competitiveness of the sector.
7. Separate risk limits for credit portfolios like advances to NBFC and unsecured loans that require special monitoring.

Review and Monitoring

1. All credit exposures, once approved, are monitored and reviewed periodically against the approved limits. Borrowers with lower credit rating are subject to more frequent reviews.
2. Credit monitoring involves independent review of credit risk assessment, compliance with internal policies of the Bank and with the regulatory framework, compliance with the sanction terms and conditions and effectiveness of loan administration.
3. Customers with emerging credit problems are identified early and classified accordingly. Remedial action is initiated promptly to minimize the potential loss to the Bank.

Concentration Risk

The Bank controls concentration risk by means of appropriate sectoral limits and borrowers limits based on creditworthiness. The Bank also captures the Concentration risk by monitoring the geographical exposure.

Large exposures to individual clients or group

The Bank has individual borrower-wise exposure ceilings based on the internal rating of the borrower as well as group-wise borrowing limits. The Bank monitors the level of credit risk (Low/Moderate/High/Very High) and direction of change in credit risk (increasing /decreasing/ stable) at the portfolio level.

Definition of Non-Performing Assets

Bank has adopted the definition of the impaired assets (for accounting purposes) as defined by the regulator for income recognition and asset classification norms.

The Bank monitors the rating-wise distribution of its borrowers also.

Exposure to Industries

Industry analysis plays an important part in assessing the concentration risk within the loan portfolio. Particular attention is given to industry sectors where the Bank believes that there is a high degree of risk or potential for volatility in the future. The Bank has fixed internal limits for aggregate commitments to different sectors so that the exposures are evenly spread over various sectors.

The credit policy deals with short term as well as long term approach to credit risk management. The policy of the Bank embodies in itself the areas of risk identification, risk measurement, risk grading techniques, reporting and risk control systems /mitigation techniques, documentation practice and the system for management of problematic loans.

Disclosure for portfolios subject to the standardized approach

Large corporate borrowers and Public Sector Enterprises are being encouraged to solicit ratings from approved external rating agencies and wherever such ratings are available the Bank uses the same in assigning risk weights. Bank has approved 6 domestic credit rating agencies identified by RBI i.e. CRISIL, CARE, India Ratings and Research Private Limited (earlier FITCH India), ICRA, Brickwork and SMERA Ratings Limited. The ratings available in public domain are mapped according to risk profile and specific risk characteristics of each rating grade of respective agencies as envisaged in RBI guidelines.

(₹ in crore)

SI. No.	Risk weight	Exposure Outstanding
1	Below 100%	11751.07

Credit Risk Mitigation: Disclosures for Standardized Approach

As stipulated by the RBI guidelines, the Bank uses the comprehensive approach for collateral risk mitigation. Under this approach, the Bank reduces its credit exposure to counterparty when calculating its capital requirements to the extent of risk mitigation provided by the eligible financial collateral as specified in the Basel guidelines.

Types of eligible financial collateral / Guarantors:

The Bank recognizes only specified types of financial collateral and guarantees (counter-guarantors) for providing capital relief in line with Basel II guidelines on credit risk mitigation.

This includes cash, Bank own deposits, gold (including bullion and jewellery, subject to collateralized jewellery being notionally converted/benchmarked to 99.99 per cent purity), securities issued by the Central and State Governments, Kisan Vikas Patra, National Savings certificates, life insurance policies with a declared surrender value which is regulated by IRDA, certain debt securities rated by a recognized credit rating agency, certain debt securities not rated but issued by Banks and listed on a recognized exchange and are classified as senior debt, certain mutual fund units where daily Net Assets Value (NAV) is available in public domain .

Eligible Guarantors (counter-guarantors):

Credit protection given by the following entities is recognized:

- (i) Sovereigns, sovereign entities (including BIS, IMF, European Central Bank and European Community as well as permitted MDBs, ECGC, CRGFTLIH and CGTMSE), banks and primary dealers with a lower risk weight than the counterparty;
- (ii) Other entities that are externally rated except when credit protection is provided to a securitization exposure. This would include credit protection provided by parent, subsidiary and affiliate companies when they have a lower risk weight than the obligor.

- (iii) When credit protection is provided to a securitization exposure, other entities that currently are externally rated BBB- or better and that were externally rated A- or better at the time the credit protection was provided. This would include credit protection provided by parent, subsidiary and affiliate companies when they have a lower risk weight than the obligor.

The extent of total credit exposure (under the standardized approach) covered by eligible financial collaterals after application of haircuts are furnished below:

(₹ in crore)	
Eligible financial collaterals after haircuts	4576.29
Eligible guarantees	731.19

5. MARKET RISK & LIQUIDITY RISK

The Bank has put in place Board approved Integrated Treasury Policy and Asset Liability Management (ALM) policy for effective management of market risk in the Bank. The objective of Integrated Treasury Policy is to assess and minimize risks associated with treasury operations by extensive use of various risk management tools. Broadly, it encompasses Policy prescriptions for managing systemic risk, credit risk, market risk, operational risk and liquidity risk in treasury operations.

For market risk arising out of various products in treasury and its business activities, the Bank has set regulatory / internal limits and ensures the adherence thereof. Migration of ratings is tracked regularly. Limits for exposures to counter-parties, industries and countries are monitored and the risks are controlled through Stop Loss Limits, Overnight limit, Daylight limit, Aggregate Gap limit, Individual gap limit, Value at Risk (VaR) limit for Forex, Inter-Bank dealing and various investment limits. For the Market Risk Management the Bank has a Mid Office. The functions of Mid Office are handled by Integrated Risk Management Department.

The Board, IRMC & ALCO are overseeing the market risk management of the Bank, procedures thereof, implementing risk management guidelines issued by regulator, best risk management practices followed globally and ensures that internal parameters, procedures, practices/policies and risk management prudential limits are adhered to.

The policies for hedging and/or mitigating risk and strategies and processes for monitoring the continuing effectiveness of hedges/mitigates are discussed in ALCO and based on views taken by / mandates of ALCO, hedge deals are undertaken.

Liquidity risk of the Bank is assessed through daily gap analysis for maturity mismatch based on residual maturity in different time buckets as well as various liquidity ratios and management of the same is done within the prudential limits fixed thereon. Advance techniques such as Stress testing, simulation, sensitivity analysis etc. are conducted on regular intervals to draw the contingency funding plan under different liquidity scenarios.

Market Risk in Trading Book

Bank has adopted the Standardized Duration Approach as prescribed by RBI for computation of capital charge for market risk and is fully compliant with such RBI guidelines. Bank is now preparing itself for the Advanced Approach based on a Value at Risk (VaR) model, which is under implementation.

The capital requirements for market risk are detailed below:

6. INTEREST RATE RISK IN THE BANKING BOOK (IRRBB)

The interest rate risk is viewed from two perspectives i.e. 'Earnings Perspective' and 'Economic Value Perspective'. Generally, the former is measured using Earnings-at-Risk (EaR) under Traditional Gap Analysis (TGA) and the latter is measured through changes in the Market value of Equity (MVE) under Duration Gap Analysis (DGA).

- **Earnings-at-Risk (EaR):** All the Rate Sensitive Assets (RSA) and Rate Sensitive Liabilities (RSL) maturing/re-pricing up to 1 year are bucketed as per Traditional Gap Analysis (TGA) and EaR analysis is conducted by applying various shocks on product-wise weighted average interest rates in each time band. EaR is quantified by changes in the NII and NIM in comparison with the previous financial year end.

- **Impact on Market Value of Equity (MVE):** Impact on Market Value of Equity (MVE) is analyzed through Duration Gap Analysis (DGA) which involves bucketing of market value of all Rate Sensitive Assets and Rate Sensitive Liabilities as per residual maturity/ re-pricing in various time bands and computing Modified Duration Gap. Accurate method is adopted for computing the market value by discounting each cash flow of all Rate Sensitive Assets (RSA) and Rate Sensitive Liabilities (RSL) with various discount curves as suggested by RBI. Notional interest rate shocks are applied on the resultant Modified Duration Gap to arrive at the changes in the Market Value of Equity (MVE).
- Prudential limits have been fixed for changes in NIM and MVE for 200bps shock in the interest rates and monitored on a monthly basis.
- Earning at Risk for 200 bps interest rate shock is estimated at ₹34.63 crore and change in the Market value of Equity for 200 bps interest rate shock is 4.53%.

7. OPERATIONAL RISK

Strategies and Processes

Bank has initiated several measures to manage operational risk through identification, assessment and monitoring of inherent risks in all its business processes. A framework has been laid to capture loss data which can be mapped to operational risk events to measure the impact quantitatively. Bank has put in place a hierarchical structure to effectively manage operational risk through the formation of internal committee viz., Operational Risk Management Committee (ORMC).

Scope and Nature of Operational Risk Reporting and Measurement Systems

A systematic process for reporting risk events, loss events, "near misses" and non-compliance issues relating to operational risks have been developed and implemented. All critical risks and potential loss events are reported to the senior Management/ORMC/IRMC as appropriate for their directions and suggestions.

An Operational Risk Management Policy approved by the Risk Management Committee of the Board details the framework for hedging and/or mitigating operational risk in the Bank. As per the policy, all new products are vetted by the New Product Approval Committee to identify and assess potential operational risks involved and suggest control measures to mitigate the risks.

Approach for Operational Risk Capital Assessment

As per the RBI guidelines, the Bank has adopted Basic Indicator Approach for computing capital charge for Operational Risk. Steps have been initiated to migrate to the Advanced Measurement Approach.

Exposure Related to Counterparty Credit Risk

Counterparty Credit Risk exposures for banks are assessed based on Bank's business requirements and considering counterparty bank's parameters such as CRAR, net worth, NPA level etc. Counterparty exposures for other entities are assessed subject to exposure ceilings as per the Loan Policy of the Bank. Capital for Counterparty Credit Risk exposure is assessed based on Standardized Approach.

2.3.2. Employee Stock Options (ESOP)

The shareholders of the Bank had approved on 15.7.2006 grant of equity shares under employee stock option scheme of the Bank framed in compliance with SEBI (Employee Stock Option Scheme & Employee Stock Purchase Scheme) Guidelines, 1999.

Under the scheme, the Bank had granted stock options to the eligible employees on various dates in the past, each option entitling for one share at an exercise price of ₹50 per share (adjusted to ₹46.20 per share post rights issue 2011) The options granted to employees had vested in a graded manner and these may be exercised by the employees within a specified period. Options vested but not exercised before the specified exercise period would lapse. The Bank follows the intrinsic value method to account for its stock-based employee compensation plans. Compensation cost is measured by the excess, if any, of the fair market price of the underlying stock over the exercise price as determined under the option plan. The fair market price is the closing price on the stock exchange where there is highest trading volume on the working day immediately preceding the date of grant. Compensation cost has been absorbed.

2.4 Accounting Standard 17- Segment reporting:

For the purpose of segment reporting in terms of AS 17 of ICAI and as prescribed in RBI guidelines, the business of the Bank has been classified into 4 segments i.e. (a) Treasury operations (b) Corporate / Wholesale Banking (c) Retail Banking and (d) Other Banking Operations. Since the Bank does not have any overseas branch, reporting under geographic segment does not arise. Segment assets have been identified and segment liabilities have been allocated on the basis of segment assets.

3.14 Disclosure of remunerations
a) Qualitative disclosure:
Remuneration Committee

The Nomination & Remuneration Committee (N&RC) consists only Independent Directors, two of them being the members of Integrated Risk Management Committee of the Board (IRMC) also.

Objectives of Compensation Policy

Compensation Policy aims to attract and retain the right candidates in the Bank. The policy is designed to support key business strategies and create a strong, performance-orientated environment besides providing reasonable remuneration commensurate with the growth of the Bank. It also ensures effective governance of compensation, alignment of compensation with prudent risk taking, effective supervisory oversight and stakeholder engagement. The Policy also aims at facilitating effective succession planning in the Bank.

The N&RC works in close coordination with the Integrated Risk Management Committee to ensure effective alignment of remuneration and risks.

Risk adjustments in remuneration

A wide variety of measures of credit, market and liquidity risks are used by bank in implementation of risk adjustment. The risk adjustment methods have both quantitative and judgmental elements. Compensation outcomes are symmetric with risk outcomes and compensation payouts are sensitive to the time horizon of the risk.

Performance linked variable compensation, deferral and forms

The performance-based remuneration motivates and rewards high performers who strengthen long-term customer relations, and generate income and shareholder value. The bank's compensation policy stipulates that while designing the compensation package to WTD/CEO, it is ensured that there is a proper balance between fixed pay and variable pay. While fixing the Variable Pay performance parameters under financial and non-financial areas of operations shall be assessed.

The variable pay shall not exceed 70% of the fixed pay in a year. The deterioration in the financial performance of the bank should generally lead to a contraction in the total amount of variable remuneration to be paid.

Further, where the variable pay constitutes a substantial portion of the fixed pay (i.e. 50% or more of the fixed pay), an appropriate portion of the variable pay, say 40% to 60% must be deferred for over a period. The Board/Nomination & Remuneration Committee may grant stock options under the Employees Stock Options Plan/Scheme as per Securities and Exchange Board of India (Employee Stock Option Scheme and Employee Stock Purchase Scheme) Guidelines, 1999, subject to the approval of Reserve Bank of India under Section 35B of the Banking Regulation Act, 1949. Such Stock Options will be excluded from the components of variable pay. In case variable pay payable is 50% or more, deferral arrangements of variable pay shall be applied. The deferral period should not be less than three years. Compensation payable under deferral arrangements should vest on a pro-rata basis at such rates as may be decided by the Board/RC. In the event of negative contributions of the Bank and/or the relevant line of business in any year, the deferred compensation is subject to malus/claw back arrangements. The variable pay could be in cash, or stock linked instruments or mix of both.

Qualitative Disclosures:

Bank is computing LCR on a monthly basis in line with the RBI circular dated June 9, 2014 on “Basel III Framework on Liquidity Standards - Liquidity Coverage Ratio (LCR), Liquidity Risk Monitoring Tools and LCR Disclosure Standards”. These guidelines ensure that banks maintain sufficient amount of High Quality Liquidity Assets (HQLA) to survive 30 days stress scenario so that banks can take corrective measures within such period. These HQLA have to be 100% of the net cash outflows with effect from January 1, 2019. To provide sufficient transition period, the guidelines require maintaining minimum 60% with effect from January 1, 2015 and step up of 10% every year to reach 100% by January 1, 2019.

Necessary system is in place to compute LCR and bank's strategy would be to maintain LCR well above the regulatory minimum levels ahead of the stipulated timelines. The main driver of LCR is adequate HQLA and Bank is maintaining LCR well above the minimum stipulated level of 60% in view of SLR investments in excess of statutory requirement and 7% of NDTL in the form of borrowing limit available through Marginal Standing Facility (MSF) and Facility to Avail Liquidity for Liquidity Coverage Ratio (FALLCR). The bank has a diversified liability mix and comprises of healthy Retail Deposits with its pan India presence and the dependency on wholesale funding is insignificant.

Bank's Asset Liability Management Committee (ALCO) is empowered to monitor and form suitable strategies to maintain stipulated levels of LCR by channelizing funds to target good quality asset and liability profile to meet Bank's profitability as well as liquidity requirements

Funding strategies are formulated by the Treasury and Accounts Department (TAD) in accordance with ALCO guidance. The objective of the funding strategy is to achieve an optimal funding mix which is consistent with prudent liquidity, diversity of sources and servicing costs. Accordingly, TAD estimates daily liquidity requirement. With the help of structural liquidity statement prepared by Bank, TAD evaluates current and future liquidity requirement and takes necessary action.
